

# Tax AI in the '20s

Tax AI has enormous potential, and isn't as far off as you might have thought. Building on the strong legacy of 'traditional' tax technologies, anomaly detection can already be an excellent tool for the tax professional to spot exceptions and focus their review. As long as vendors are clear and upfront on the effort and cost then expectations can be set and met. Whilst admittedly reliant on data quality, Tax AI can and should be a firm part of the tax department for everyone this decade.
