

In conversation with Nerida Scott, Johnson & Johnson Innovation

On demand
Fireside Chats

Participants

Moderator: Paul Tunnah - Founder, pharmaphorum, Chief Content Officer & UK MD, Healthware Group

Guest: Nerida Scott - Head, Johnson & Johnson Innovation, EMEA

Answering the need: responsive CDMO partnerships

On demand
Collaboration Close ups

The pandemic has pressurized development, regulatory, manufacturing, and distribution timelines like never before and the biotech industry has responded rapidly to the urgent global needs for vaccines as well as other biopharmaceuticals. In the middle of this pressure-system are the people and companies that have come together to provide the needed solutions to the development and production crunch points. This collaboration close up will take a deep dive into the partnership between Rentschler Biopharma and BioNTech and examine what it took to make this collaboration successful.

Participants

Moderator: Lucie Ellis - Executive Editor, In Vivo, Informa Pharma Intelligence

Guest: Oliver Hennig - Senior VP, Operations, BioNTech

Guest: Federico Pollano - Senior VP, Global Business Development, Rentschler Biopharma SE

Pathways to leadership

On demand
Panel Discussions

This discussion will address the structural and cultural changes within companies, and the wider biotech industry, that can/must be made to support the advancement of people of colour, women and other under-represented groups to positions of leadership.

Participants

Moderator: Elliot Francis - Director, Diversity and Inclusion, BIO (Biotechnology Innovation Organization)

Panelist: Lori Badura - VP and Head, Neurology and Immunology, Global Business Development & Alliance Management, Merck KGaA

Panelist: Paul Hastings - CEO, Nkarta Therapeutics

Panelist: Rachel Mears - Partner, Jeito Capital

Panelist: Uzair Qadeer - Chief Diversity Officer, Alexion

A new spotlight on fill and finish manufacturing

On demand
Collaboration Close ups

Vincenza Pironti and Dan Stanton discuss the role fill and finish manufacturing has historically played within the biotech development chain and how the operators in this space have responded to the unprecedented demands made on capability and capacity during the pandemic. Using her own experience at ThermoFisher Scientific, Vincenza outlines the crunch points that manufacturers have faced and the solutions that been implemented to answer the urgency of the global crisis.

Participants

Moderator: Dan Stanton - Editor and Founder, Bioprocess Insider, part of Informa Life Sciences' BioProcess International

Guest: Vincenza Pironti - Global SME, Steriles, ThermoFisher Scientific

The role of endotoxin removal in clinical applications

On demand
Fireside Chats

Biomaterials, such as gelatin, have certain regulatory requirements they have to meet if they are to be used in clinical applications. A key focus of these regulations is to ensure low endotoxin levels such as lipopolysaccharides (LPS), which can affect cell viability, proliferation and even stem cell differentiation. In this fireside chat, Elien Gevaert will discuss why endotoxin removal is essential for a number of gelatin-based applications, how Rousselot's X-Pure range delivers regulatory-compliant low endotoxin gelatins and the role that considerations of biomaterial purity play in ensuring the smooth and successful translation from bench to bedside.

Participants

Moderator: Julianna LeMieux - Science Writer, GEN: Genetic Engineering and Biotechnology New

Guest: Elien Gevaert - Principal Scientist Pharmaceutical, Rousselot

New directions in oncology

On demand
Panel Discussions

Participants

Moderator: Luc Marengère - Managing Partner, TVM Capital

Panelist: Khatereh Ahmadi - Executive Director, Business Development and Licensing, MSD

Panelist: Michel Dethoux - CEO, iTeos Therapeutics

Panelist: Johnston Erwin - VP, Corporate Business Development, Eli Lilly and Company

Panelist: Michael Palladinetti - Head of Immunology, Oncology and Neuroscience, Global Business Development & Licensing, Sanofi

Maintaining robust supply chain management during COVID-19 and strategy for post-pandemic

On demand
Collaboration Close ups

As the demand for the biotech products is increasing, pharma companies have developed strong yet complex supply chain management systems to balance the ongoing supply and demand requirements. As maintaining supply for different client expectations is critical, identifying and developing a mitigation plan is necessary to secure business continuity. With high exposure to events like the COVID-19 pandemic that may cause disruption, building a resilient supply chain is essential to manage supply chain risk and protect consumers. In a situation like this, creating close manufacturer-vendor communication channel is important and this session will explain how to manage and maintain secure supply chain to robustly operate in a 'crisis mode' and what future considerations should be made to be prepared after the pandemic.

Participants

Moderator: Mike Ward - Global Head of Thought Leadership, DRG, part of Clarivate

Guest: Kyoung Lim - VP, Supply Chain Management Team, Samsung Biologics

Guest: Sophia Lim - GM, Bioprocess Commercial Asia, Cytiva

Guest: Benoit Opsomer - VP and Head of Bioprocessing, Merck KGaA

Moderator: Eric de La Fortelle - Venture Partner, Seventure Partners

Guest: Ken Blount - VP, Microbiome Research, Ferring

Guest: Randy Goodman - U.S. Market Access Engagement Director, Voisin Consulting Life Sciences

Collaboration Closeup: Genentech, a Member of the Roche Group and Vaccibody

On demand
Collaboration Close ups

Participants

Moderator: Andrew McConaghie - Senior Writer, Scrip

Guest: Michael Engsig - CEO, Vaccibody

Guest: Don O'Sullivan - Head of Oncology, Pharma Partnering, Roche

Blockbuster potential – what's next

On demand
Fireside Chats

Participants

Moderator: Alexandra MacLean - Principal, TVM Capital

Guest: Laurent Levy - CEO, Nanobiotix

Step change: clinical trials after the pandemic

On demand
Panel Discussions

Clinical trials have been under a microscope like never before and a number of changes which were emerging before the pandemic have been accelerated by new ways of working, new ways of collaborating, and new awareness of the need to fully serve a diverse global population equitably. This session will discuss the digitalization of clinical trials, the emergence of adaptive trials and how both of these developments could contribute to the increased need for trial transparency and diversity.

Participants

Moderator: Danielle Friend - Senior Director, Science and Regulatory Affairs, BIO (Biotechnology Innovation Organization)

Panelist: François-Henri Boissel - CEO and Co-Founder, NOVA discovery

Panelist: Tam Nguyen - Deputy Director of Research, St Vincent's Hospital Melbourne

Panelist: Rodman Stull - VP and General Manager, Clinical Services Americas, Thermo Fisher Scientific

Panelist: Wim Vos - CEO, Radiomics

Research strategy and partnership potential at Merck KGaA

On demand
Fireside Chats

Participants

Moderator: Sascha Berger - Partner, TVM Capital

Guest: Martin Picard - Head of External Research & Development, Merck KGaA

Big data and AI: applications in the real world

On demand
Panel Discussions

The combination of big data and AI/ML is a powerful one and nowhere more so than in healthcare. This panel will explore the evolving applications of big data and AI within the industry, looking beyond drug discovery to new ways these technological approaches can transform the equitable healthcare delivery.

Participants

Moderator: Paul Tunnah - Founder, pharmaphorum, Chief Content Officer & UK MD, Healthware Group

Panelist: Jukka Corander - Head of AI, Nanoform

Panelist: Nora Khaldi - Founder and CEO, Nuritas

Panelist: Nick Scott Ram - Managing Director, Life Sciences, Sensyne Health

Repositioning Drugs for New Indications or Markets

On demand
Fireside Chats

The pharma industry is constantly looking for ways to shorten timelines, improve efficiencies and increase patient impact. One way companies can achieve these goals and reach new patient populations is by repositioning drugs, allowing them to leverage research and development which has been completed for medicines already on the market or in the clinic. The process of repositioning drugs for new indications or new markets can pose unique considerations. In this interview, our Catalent expert will discuss the challenges associated with advancing a repositioned drug and how to overcome them to achieve strategic success.

Participants

Moderator: Linda Pullan - Founder, Pullan Consulting

Guest: Judith Jones - Director, Regulatory Affairs, Europe, Catalent

Investment success stories that make Catalonia the healthcare innovation hotspot of Europe

On demand
Panel Discussions

This roundtable session takes a closer look at the strength of investment in the Catalonia region through case studies of some of the most successful companies headquartered there. Hear directly from the CEOs of four companies who have experienced first-hand why Catalonia is one of Europe's innovation hotspots.

Participants

Moderator: Jordi Naval - CEO, Biocat

Speaker: Judit Anido - CEO, CataloniaBio & Healthtech

Speaker: Valerie Vanhooren - CEO, Ona Therapeutics

Speaker: Ana Maiques - CEO and Co-founder, Neuroelectric Cambridge

Speaker: Stephen Dunne - Chief Digital Therapeutics Officer, Koa Health

Closing remarks: Joan Martí - Director of Clusters Unit, Catalonia Trade & Investment, Government of Catalonia

BIO-Europe Spring

March 22–25, 2021
Delivered Digitally
Central European Time

BiotechBikers Morning Virtual Ride

06:30 - 07:30
Live Networking

Calling all [#BiotechBikers](#)

Kick off your week feeling energized and connect with other [#BiotechBikers](#). We will hold a 30-minute virtual bike ride on both Peloton and Zwift concurrently on Monday, March 22 at 6:30 am CET. Following the ride, we'll all gather for a joint watercooler networking session on Zoom. [Sign up for here.](#)

Ride Instructions: We will ride in Peloton and Zwift at the same time.

Peloton: In your Peloton profile, add the tag [#BiotechBikers](#) and set it as your leaderboard tag. Start Leanne Hainsby's 30-minute Rock Ride from 2/16/21 at 6:30am on Monday, 22 March. Send out high fives to fellow riders on the leaderboard!

Zwift: In the Zwift Companion App, follow Mark Farmery [BiotechBikers](#) from Sweden. You will receive an invitation for the ride from Mark. Accept it and you are all set. On the day of the ride, log into Zwift, fill your bidon, turn on your fan, and follow the Meetup instructions to start the group ride at 6:30 am CET. Ride on!

Watercooler Networking Instructions: Immediately following the rides, join the Watercooler Networking Session. With no time to shower, we will keep it real and show up sweaty.

EBD Group will make a donation to [Wings for Life](#) for each active rider.

[Sign up for the ride here.](#) or visit the [#BiotechBikers LinkedIn group](#)

Break and Breathe

09:00 - 09:30
Live Networking

Start, finish or simply take a break from your desk with some simple breathing techniques, movement and light stretches.

Join Alex for this live session of the popular Break and Breathe program that you might know from our face-to-face events. Increased energy levels are guaranteed.

This session is for all and no prerequisites or prior experience are required. Standing and seated (chair) positions only.

Bioproduction partnership opportunities in Paris Region

15:00 - 16:30
Roundtable

Session outline:

General introduction of the round table and the partners

Introduction of the general context of the Bio production in France and within the Paris Region

Emmanuel Dequier, Director at Grand Défi Bioproduction

Isabelle Thizon de Gaulle; VP Scientific Relations & Initiatives Europe at Sanofi France

Round table:

Moderator of the round table: Olivier Nosjean, Research Scientific Director, Servier

Industrial challenges:

- Isabelle Thizon de Gaulle; VP Scientific Relations & Initiatives Europe at Sanofi France
- Marie Urriaga, Site Head, Cell and Gene Therapy Novartis
- Kevin Alessandri, Co Founder of TreeFrog Therapeutics

Academic Challenges:

- Julien Cottineau, CTO at WhiteLab Genomics
- Anne Galy, Inserm Technological Research Accelerator (ART-TG)
 - Presentation as a binome

Clinical Challenges:

- Marina Cavazzana, Head of Research at the Imagine Institute of Genetic Diseases

Q&A with the Audience: 15 minutes

Presentation of Choose Paris Region, Medicen and Genopole: presentation of the bioproduction partnerships with the vision of the ecosystem (30')

Participants

Introduction: Emmanuel Dequier - Director, Grand Défi Bioproduction

Isabelle Thizon de Gaulle - VP Scientific Relations & Initiatives Europe, Sanofi France

Moderator: Olivier Nosjean - Research Scientific Director, Servier

Panelist - Industrial challenges: Kevin Alessandri - Co-founder, TreeFrog Therapeutics

Panelist - Industrial challenges: Isabelle Thizon de Gaulle - VP Scientific Relations & Initiatives Europe, Sanofi France

Panelist - Academic challenges: Julien Cottineau - CTO, WhiteLab Genomics

Panelist - Academic challenges: Anne Galy - Director, Inserm Technological Research Accelerator (ART-TG)

Panelist - Clinical challenges: Marina Cavazzana - Head of Research, Imagine Institute of Genetic Diseases

In the thick of it: Navigating beyond vaccine discovery

17:00 - 18:00
Plenary

The vaccines are here but the demands on and efforts of the biotech industry to innovate under new levels of global scrutiny continue. This discussion will address not only the biotech industry's rapid responses to the urgent needs of the pandemic but also the potential long-lasting impacts that new ways of working will have on drug discovery, development and distribution in other therapeutics areas, public and private investment, and collaboration approaches.

Participants

Moderator: Eleanor Malone - Editor in Chief, Commercial Insights, Informa Pharma Intelligence

Panelist: Marianne De Backer - Executive VP, Head of Strategy, Business Development & Licensing and Executive Committee Member, Bayer AG, Pharmaceuticals

Panelist: Francesco De Rubertis - Co-founder & Partner, Medicxi

Panelist: Monika Vnuk - VP, Business Development, Pfizer

Live networking - Focus on neurodegenerative disease

10:30 - 11:00
Live Networking

Join Christian Jung from Dementia Discovery Fund for an informal networking session about new developments in this therapeutic area. Breakout rooms will allow participants to interact in smaller groups around discussion questions.

Participants

Moderator: Christian Jung - Partner, Dementia Discovery Fund

In conversation with Philippe Lopes-Fernandes: partnering strategy at Ipsen

15:00 - 15:30
Fireside Chats

Participants

Moderator: Stephanie Léouzon - Partner and Head, Torreya Europe

Guest: Philippe Lopes-Fernandes - Executive Vice President and CBO, IPSEN

Coffee or Beer? : Bringing back fun meetings between serious people – A networking event sponsored by Wallonia.be

16:00 - 16:30
Live Networking

The digital era shouldn't be a reason not to have the chance to connect with people outside the strict framework of corporate calls and official emails. Take a break to meet up with other delegates to discuss informally while sipping a warm cup coffee or a refreshing Belgian Beer, depending on your time zone... and preference. Get the chance to meet up 1-on-1, 2-on-1 or even 5-on-1 by going from one table to the next, just as in live events, and rediscover random encounters. Wallonia.be invites you to this special event, so you can come closer, while at a safe distance.

Live Q&A with Roche and Vaccibody

17:00 - 17:30
Live Networking

Michael Engsig and Don O'Sullivan will field your questions around the Roche/Vaccibody collaboration as well as partnering strategies.

Participants

Discussion Leader: Michael Engsig - CEO, Vaccibody

Discussion Leader: Don O'Sullivan - Head of Oncology, Pharma Partnering, Roche

Patient-centered drug development in an age of cell and gene therapies

18:30 - 19:30
Panel Discussions

This session will focus on how the role of patients has evolved and is evolving in an era of gene and cell therapies. These new therapies present unique opportunities not only for patient involvement in the development process but pose new challenges, of all stakeholders, around the need for long-term follow up of outcomes from gene therapy. With hundreds of gene and cell therapies in the pipeline, and some now available to patients across global markets, how will we create more uniform approaches for engaging communities and sharing data and information? How do we engage and equip patient communities more consistently, particularly in disease areas like ultra-rare where patient populations are inherently scattered around the globe and where trials as well as long-term follow up will be global in nature?

Participants

Moderator: Craig Martin - Board Member and Chair of the Corporate Alliance, Global Genes

Panelist: Rodolphe Clerval - CEO, Horama

Panelist: Sheila Mikhail - Co-Founder and CEO, Asklepios BioPharmaceutical (AskBio)

Panelist: David Horn Solomon - CEO, Pharnext

SCHEDULE

DAY 2 - 23/03/2021

BIO-Europe Spring

March 22–25, 2021
Delivered Digitally
Central European Time

| TIME | FIRESIDE CHATS | LIVE NETWORKING | PANEL DISCUSSIONS |
|-------|---|---|--|
| 10:00 | | 10:30 - Live networking - Focus on neurodegenerative disease | |
| 11:00 | | | |

Delivered Digitally
Central European Time

Coffee or Beer? : Bringing back fun meetings between serious people – A networking event sponsored by Wallonia.be

09:30 - 10:00
Live Networking

The digital era shouldn't be a reason not to have the chance to connect with people outside the strict framework of corporate calls and official emails. Take a break to meet up with other delegates to discuss informally while sipping a warm cup of coffee or a refreshing Belgian Beer, depending on your time zone... and preference. Get the chance to meet up 1-on-1, 2-on-1 or even 5-on-1 by going from one table to the next, just as in live events, and rediscover random encounters. Wallonia.be invites you to this special event, so you can come closer, while at a safe distance.

BiotechBikers Virtual Ride

15:00 - 16:00
Live Networking

Calling all [#BiotechBikers](#)

Kick off your week feeling energized and connect with other [#BiotechBikers](#). We will hold a 30-minute virtual bike ride on both Peloton and Zwift concurrently on Monday, March 22 at 6:30 am CET. Following the ride, we'll all gather for a joint watercooler networking session on Zoom. [Sign up for here.](#)

Ride Instructions: We will ride in Peloton and Zwift at the same time.

Peloton: In your Peloton profile, add the tag [#BiotechBikers](#) and set it as your leaderboard tag. Start Leanne Hainsby's 30-minute Rock Ride from 2/16/21 at 15:00 on Wednesday, 24 March. Send out high fives to fellow riders on the leaderboard!

Zwift: In the Zwift Companion App, follow Mark Farmery BiotechBikers from Sweden. You will receive an invitation for the ride from Mark. Accept it and you are all set. On the day of the ride, log into Zwift, fill your bidon, turn on your fan, and follow the Meetup instructions to start the group ride at 6:30 am CET. Ride on!

Watercooler Networking Instructions: Immediately following the rides, join the Watercooler Networking Session. With no time to shower, we will keep it real and show up sweaty.

[Sign up for the ride here.](#) or visit the [#BiotechBikers LinkedIn group](#)

A Day in the life of an experienced dealmaker

17:00 - 18:00
Plenary

Join us for the always-insightful bi-annual plenary discussion on the most recent deal trends and new partnership models with global biotech and pharma leaders.

Participants

Moderator: Anton Gueth - Managing Director, EVOLUTION Life Science Partners

Moderator: Evonne Sepsis - Founder and Managing Director, ESC Advisors

Panelist: John Hamer - Managing Partner, DCVC Bio

Panelist: Genghis Lloyd-Harris - Partner, Abingworth

Panelist: Ioannis Sapountzis - Corporate SVP, Business Development and Licensing, Boehringer Ingelheim

Panelist: Jay Stamatis - VP, Business Development and Acquisitions, Abbvie

Break and Breathe

18:30 - 19:00
Live Networking

Start, finish or simply take a break from your desk with some simple breathing techniques, movement and light stretches.

Join Alex for this live session of the popular Break and Breathe program that you might know from our face-to-face events. Increased energy levels are guaranteed.

This session is for all and no prerequisites or prior experience are required. Standing and seated (chair) positions only.

Pandemic therapeutics: treating COVID-19 and beyond

17:00 - 18:00

Plenary

While vaccines have taken the limelight, the biotech industry has been working just as hard to develop therapeutic treatments for COVID-19. From innovative new treatments to repurposing well-know drugs, identifying, testing, and manufacturing safe and effective treatments still face the same high bar for approval as before the pandemic, only with the added urgency of immediate need. Hear from some of the companies at the center of this effort about their individual initiatives as well as the broader collaborations established to address the current pandemic and thinking ahead to the next.

Participants

Moderator: Alaric DeArment - Journalist, Informa

Panelist: Cameron Durrant - Chairman and CEO, Humanigen, Inc.

Panelist: Leah Lipsich - VP Strategic Program Direction, Regeneron Pharmaceuticals

Panelist: Holger Zimmermann - CEO, AiCuris Anti-infective Cures

Closing Reception

18:00 - 18:30

Live Networking
