Live Online Courses

Gain real time access to a subject matter expert delivering online training in a structured virtual classroom environment.

New LIVE online courses are an interactive and engaging digital training tool, providing real-time access to subject matter experts from our industry-leading faculty. Using webinar technology to create a virtual classroom, live online academies enable you to ask questions and discuss complicated theories to ensure a comprehensive understanding of the topic area.

Live online courses are broken down into manageable sessions that are delivered online at set times, providing a structured learning pathway for delegates. All sessions are recorded and uploaded to our virtual learning environment (VLE) where you will receive unlimited access to the materials for a month.

Choose LIVE online courses for:

- Real-time access - receive direct feedback via live discussions and Q&A
- Cost-effectiveness - zero travel and accommodation costs required
- Accessibility - all you need is an internet connection
- Convenience - bitesize sessions spread across 1-2 weeks
- Speed - Upskill teams in a short timeframe

Online Courses

Engaging online academies comprising multiple learning materials and an interactive forum, enabling you to build a flexible study plan of your own.

Online courses are perfect for busy professionals as they require just 1-2 hours per week to complete on average. Modules are released on a weekly basis and are accessed on an on demand basis, enabling you to build a flexible study plan around other commitments.

You will receive access to a comprehensive set of assets to support your learning and maintain engagement such as video presentations, quizzes and case studies. Online courses also include an interactive forum so you can ask direct questions about challenges you are facing to expert course leaders.

Choose online academies for:

- Flexibility - on demand access so you decide when you want to complete the course
- Cost-effectiveness - zero travel and accommodation costs required
- Accessibility - all you need is an internet connection
- Convenience - bitesize modules released per week
- Interaction via forum - share challenges you are facing

Customized Training

Digital training for teams designed to meet your exact requirements.

Maximize knowledge transfer across a broad base cost-effectively and efficiently with customized digital training. Leveraging our international network of over 100 industry leading trainers and our extensive experience in training we can handle the entire process of training internal teams for you - from developing the right program and choosing the expert who will connect with your teams, to delivering the training via webinars, digital licensing packages, or distributing it on your company LMS.

Select a course from our broad portfolio of existing digital courses, customize the exercises of a course to address key training requirements, or develop a completely bespoke training program to address specific challenges and suit the experience level of your team.

Choose customized digital training for:

- Tailored training - customized to directly address the challenges you are facing
- Flexibility - design a program that fits in with your schedule
- Cost-effectiveness - group training with lower costs per employee
- Confidentiality - enjoy the security of conducting company specific training in-house
- Staff motivation - collaboration between teams when training together
