

Future Ag: Sustainable Goals | September 15-16, 2020 | Hilton San Diego Mission Valley, San Diego, CA, USA

This September, join the only event around with 2 tracks that unite biological and precision ag technologies whilst looking at the bigger picture of sustainable agriculture. Experts and industry leaders share scientific and commercial content on biocontrol and biostimulants, plus a whole track dedicated to agtech and precision farming. We will be revealing mode of action insight, field trial data and ROI discussions. Meet up and coming bioag pioneers as well as core established players who are leading the way and a special focus session on newcomers to showcase fresh platforms and demonstrate the science behind products.
