11:15 - 11:45  
Portfolio Manager Presentation 2

Our REITs capability was founded in-house by lead portfolio manager and chief investment officer, Kelly Rush who has been with Principal for 33 years. Kelly and team are backed by a \$82.9 billion global real estate company (as of 30.06.2020) with over six decades of history investing in real estate. In their fundamental research the REIT team is able to leverage the substantial in-house resources from private equity and debt real estate professionals, professionals from other asset classes across Principal, a team of global economists and top-notch technology and systems.

Managed by Simon Hedger, the Principal Global Property Securities Fund has built up a track record of consistent, attractive risk-adjusted returns. It seeks to generate a total return. The investment process emphasises bottom-up stock selection in search of above average companies trading at average or discounted valuations.

### Ninety One Global Environment Fund

13:30 - 14:00

Portfolio Manager Presentation 2

Ninety One Global Environment Fund

To combat climate change and reduce carbon emissions, the world needs to transform. The Ninety One Global Environment Fund invests in companies leading the transition to a low carbon world and so, we believe, will benefit from a multi-year structural tailwind. The Fund takes a unique investment approach focused on investing in the winners across the supply chain of decarbonisation - renewable energy, electrification and resource efficiency. We believe active engagement is one of the most powerful tools we have available and we engage regularly with every company in our portfolio, reporting our progress to clients in our Annual Impact Report.

Our high conviction, concentrated portfolio with high active share can, we believe, provide differentiated alpha and rebalance climate risk within other parts of global portfolios. It can also make an impact: investing in businesses helping to solve one of the biggest challenges facing the planet.

All investments carry the risk of capital loss.
